THE **ULTIMATE** VISION

At Ultimate Boats we hand craft boats where “Compromise Is Not an Option”.

We have 50 years of combined boating, and marine industry knowledge. We are turning the hard wearing New Zealand tinnie, into a world class aluminum boat, with style and comfort, that caters for fishing, watersport's and family day boating.

Ultimate Boats Naval Architect went about designing two models that fitted a design brief for the Ultimate 21 focused on Safety, Durability, and Comfort.

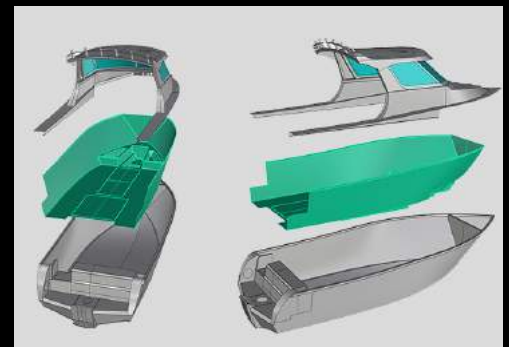

ULTIMATE 21 ELITE

The Ultimate 21 Elite is a new concept in alloy craft to New Zealand and the first completely new design which utilises Ultimate Boats innovative new Hull in Hull Technology. It incorporates an all Alloy Space frame, all Alloy Hull and Cabin with the strength, quietness, warmth, and soft riding characteristics from its full GRP internal structure (hull in hull technology).

The benefits of this GRP internal structure are that it firstly provides additional safety protection. The Hull in Hull Technology means that with any form of frontal impact or side on impact the boat would need to be penetrated through 2 strong and rigid skins before it compromises its ability to remain afloat, and keeping your friends and family safe.

The Hull in Hull Technology characteristics are quietness, warmth, soft riding, balanced weight distribution, and stability. It also has the added benefit of having the style and finesse required by all members of the family, with a seamless, high quality and easy care finish inside the boat. This allows the customization of alloy with the comfort of GRP. The Ultimate 21 Elite is the biggest innovation in the aluminium powerboat market in many years, and is game changing to the industry.

Standard Features

Alloy bow sprit	Bow rail	Hatches	Tread plate floor
Alloy rod holders x 4	Buoyancy tanks	Lined cabin	Underfloor storage
Alloy rocket launcher	Hydraulic Steering	Navigation lights	VHF radio
Battery and switch	Fuel filter	Self draining anchor	Walk through transom
Bilge pump	Fuel tank (150ltr)	Transom storage	Wiring & switch panel

Optional Extras

Auto winch, rope and chain	Full squabs	Paint solid top
Bait board	Fusion stereo	Paint metallic top
Boarding ladder	Trailer - Tandem braked	Paint full solid
Capstan, rope and chain	Internal lighting	Paint full metallic
Bolstered easy rider seats	King/Queen seat	Trailer - Single braked
Deck wash	Safety kit - 2 person	Wiper

Specifications

Hull bottom & transom	6mm	LOA	6.35m
Hull sides	4mm	Beam	2.45m
Deadrise	18 Degrees	Recommended HP	115HP - 200HP
Length on trailer	7.5m	Height on trailer	2.96m
Tow weight	2000kg	Width on trailer	2.45m
